

⇒ npm init Nodejs

⇒ index.js

⇒ I need a package to start server

→ Express is the package npm install Express

→ the imports

```
const express = require("express");  
const app = express();
```

choosing the port

```
app.listen(8000, (err) => {
```

```
  if (err) throw err
```

```
  console.log("server is listening in port", 8000)
```

then we write in cmd prompt node index.js

For starting the server

⇒ Creating a Router

```
app.use("/", (req, res) => {  
  res.json({message: "hello"})  
})
```

kernel automatically restart if package
esna nodemon

Think client is like Postman but an Extension

⇒ install mysql2

⇒ create file in a folder called db.config.js
